Dear Sir:

In response to the Office action mailed July 1, 2004,  
please amend the application as follows:

1. (Currently amended) An electrical connector  
comprising:

a dielectric housing having a bottom wall that has  
opposite lateral sides, opposite lateral walls, each of  
which extends uprightly from a respective one of said  
lateral sides of said bottom wall and has an upper wall  
portion and a lower wall portion, and a partition wall  
parallel to and disposed above said bottom wall, said  
partition wall extending between said lateral walls and  
having opposite lateral ends, each of which is connected to  
a junction of said upper and lower wall portions of a  
respective one of said lateral walls, said partition wall  
cooperating with said lower wall portions of said lateral  
walls and said bottom wall so as to confine a first card  
receiving space, said dielectric housing further having a  
front open side for access into said first card receiving  
space, and a rear side;

a cover plate mounted on said lateral walls and  
disposed above said partition wall of said dielectric
